Work Experience

Software Developer | Policy Monitor Ltd | 2024 - present

CSPM - Cyber Security Product development

Tech stack: Angular, Java, SQL, MariaDB, LDAP, Apache Tomcat, Maven, AWS Cloud Services, Figma for UX.

- Product development work encompassing a full-stack product and customer management in the cyber security space.

Diegesis Hub - Timesheet and Invoicing Platform development

Tech stack: Angular, Java, SQL, UX Design, Data Analytics, AWS Cloud Services, Figma for UX.

- Refactored the data architecture to enable persistent storage and historical insights.
- Improved database performance by 10x through query optimisation.
- Designed UX-driven features for project managers.
- Automated monthly analytics reporting, saving time for PMs and senior leadership.
- Delivered accurate monthly invoices and timesheets across teams.
- Rewritten user documentation to support wider adoption and future development.

GenAI Code Conversion Tool

Tech stack: OpenROAD 4GL, C#, HuggingFace, Python, InstructLAB.

- Contributed to a generative AI code conversion tool to translate OpenROAD 4GL to C#.

AI Document Assembly Tool

Tech stack: Angular, TypeChat, LMStudio, Python.

- Developed a document summarisation app incorporating Microsoft's TypeChat NLP framework with an Angular frontend and Python backend.

Infrascale Integration

Tech stack: Java, Camel DSL, SOAP APIs.

- Developed a Java based integration interface with Infrascale backup services, including error handling, validation design and secure API standards.

2iC - Device Communication in Low Latency Networks

Tech stack: Java, Networking, Node-RED, Lean Service Architecture.

- Developed service board functionality to fetch remote platforms for their “Mission Control” product.
- Updated training documentation to reflect updates in product development.

Training

- Diegesis training in Ingres, DBA, SQL, ABF and OpenROAD 4GL.
- Member of company Special Interest Group training in UX/UI.

Skills and Certifications

Java, C#, SQL, Angular, Camel DSL, SOAP and REST APIs, Lean Service Architecture and Microservice Architecture, Generative AI (Oracle Cloud Infrastructure 2024 Generative AI Certified Professional), Cloud Technologies (AWS Solutions Architect), Quantum Computing (IBM Quantum Business Foundations).

Previous Employment

Lecturer in Philosophy | Pembroke College, Oxford | 2022 - 2023

Taught advanced courses in formal philosophy (logic, metaphysics). Wrote and delivered lectures for the Advanced Philosophy of Physics course.

Graduate Teaching Assistant | London School of Economics | 2017 - 2022

Led undergraduate classes in introductory philosophy, philosophy and foundations of physics and the philosophy and foundations of finance.

Teacher of Mathematics and Physics | Bedford School | 2015 - 2017

Taught classes in GCSE, IB HL and A-level Further Mathematics.

Education

Java Software Engineer | Firebrand bootcamp | 2023 - 2024

Took examined courses in: Certiport IT Java Specialist, Microsoft Azure Fundamentals AZ-900, Microsoft Developer Associate AZ-204.

PhD Philosophy | London School of Economics | 2017 - 2022

Thesis: “Identity and Indistinguishability in Thermal Physics”. Published articles in leading philosophy journals. Presented my research at leading international philosophy conferences. For publications, and other writing, see my website.

MPhysPhil Physics and Philosophy (2.i) | Brasenose College, Oxford | 2011 - 2015

Academic Exhibition. Led the Astronomy Society’s initiative to restore their abandoned telescope and dome.

Volunteering

Treasurer | The Order of Malta Volunteer | 2020 - 2024

Managed the charity’s activities with the Chairman, I took responsibility for the charity’s finances, budgets and annual accounts in collaboration with the Trustees.

Quantum Computing Course Leader | Diegesis Ltd | 2025 - present

Designing and leading a course on Quantum Computing for the benefit of employees’ CPD, following IBM’s *Quantum Business Foundations* course.
